Variable, Object, vector, functions, etc.

## Table of contents

0.1	Intro . . . . .	1
0.2	np array . . . . .	1

### 0.1 Intro

```
print("Hello, world!")
```

```
Hello, world!
```

### 0.2 np array

```
# Your Python code
#py_install("numpy")
import numpy as np

arr = np.array([1, 2, 3, 4, 5])
print(arr * 2)
```

```
[ 2  4  6  8 10]
```
